

# Embedded Finance

AI-driven money movement without the headaches.

Moving money is the lifeblood of any business — but it's also one of the hardest things to get right. Disbursements, settlements, compliance requirements, and outdated systems make the process costly, slow, and error prone.

Our **AI-first embedded finance platform** is designed from the ground up to simplify complex financial workflows. With a proprietary engine at its core, it integrates seamlessly into your business, replacing manual processes with automation and real-time visibility. The result? **A faster, smarter, more compliant way to move money.** We provide end-to-end support for:

## Digital disbursements

Ensure your customers and partners get paid on time, every time.

## Settlement management

Remove the delays and bottlenecks of legacy accounting and finance systems.

## Payment processing

Through our role as a payment facilitator (PayFac) — so you no longer need to juggle multiple vendors.

## Digital wallets and alternative payments

Give your users flexibility and improve their transaction experience.

## AI at the Core: Compliance and Accuracy

AI isn't just an add-on — it's the foundation of our fintech platform. Our system continuously monitors transactions for accuracy, compliance, and efficiency. By reducing errors and flagging risks in real time, AVATARé helps you operate with confidence. Why it matters:

**Reduce compliance risks** with built-in AI safeguards.

**Boost cash flow** by accelerating settlement times and detecting errors.

**Eliminate manual work** and reduce operational costs.

**Increase transparency** with live tracking and reporting.
